PROFESSIONAL SUMMARY

Frontend-Focused Software Engineer with experience building scalable frontend applications and supporting high-availability production environments across logistics, fintech, and enterprise platforms. Specialized in React, Next.js, TypeScript, and Node.js, with strong expertise in distributed systems troubleshooting, application performance optimization, and production reliability for platforms serving millions of users. Proven track record of reducing application latency by 25%, improving deployment success rates by 35%, and maintaining 99.9% platform uptime.

CORE TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL

Databases: MongoDB, MySQL, PostgreSQL, Oracle SQL

Cloud & DevOps: AWS, Azure, Docker, GitHub Actions, Jenkins, CI/CD Pipelines

Monitoring & Observability: Dynatrace, Grafana, Application Performance Monitoring (APM)

Automation & Scripting: Python, PowerShell, UiPath, Power Automate

Methodologies: Agile/Scrum, Root Cause Analysis (RCA), Incident Management

Tools: Git, GitHub, Vitest, Jest, React Testing Library, Amazon S3, CloudFront, Google Cloud Platform, Figma, Salesforce, Retool, Jira, Confluence

PROFESSIONAL EXPERIENCE

Purolator Inc. — Software Engineer (Frontend / Production Systems)

Remote, Canada | Aug 2025 – Present

Tech Stack: React.js, TypeScript, REST APIs, GitHub Actions, Jenkins, Dynatrace, Grafana, AWS

- Architected high-performance frontend components for enterprise logistics platforms, improving UI responsiveness by 30% and reducing page load times by 25%.
- Resolved complex frontend, API, and integration bottlenecks across distributed systems, reducing application latency by 20%.
- Optimized CI/CD pipelines using GitHub Actions and Jenkins, reducing deployment failures by 35% and accelerating release cycles by 40%.
- Implemented frontend monitoring and observability practices with Dynatrace and Grafana, reducing production incidents by 30% and improving mean time to detection (MTTD) by 50%.
- Enhanced state management and client-side rendering for high-volume shipment tracking workflows, supporting thousands of concurrent users with 99.9% platform uptime.
- Led root cause analysis (RCA) for critical production issues, implementing permanent fixes that improved system reliability and reduced recurring incidents by 45%.

Skill4Skill — Contract Full Stack Engineer (Frontend Focused)

Remote, Canada | Jul 2025 – Aug 2025

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, ESLint, Git

- Built responsive Next.js server and client components, establishing scalable UI architecture that reduced development time for new features by 30%.

- Refactored legacy code into modular, reusable React components, reducing code duplication by 40% and improving maintainability.
- Established code quality standards with ESLint, Prettier, and pre-commit hooks, reducing merge conflicts by 60% and improving team collaboration.

Findworka — Freelance Frontend Developer (Part-Time)

Hybrid | Nigeria / Canada | Feb 2022 – Jul 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript

- Developed and maintained customer-facing web applications using React and modern frontend tools, improving user engagement by 35%.
- Optimized frontend performance through code splitting and lazy loading, reducing load times by 25% and improving Lighthouse scores by 20 points.
- Mentored junior developers on React.js, JavaScript, frontend architecture, and API integration best practices, accelerating onboarding by 50%.

Guaranty Trust Bank (GTCO) — Production Engineer / Unit Head

Hybrid | Nigeria | Oct 2022 – Jul 2025

Tech Stack: Python, PowerShell, Dynatrace, Grafana, Oracle SQL, AWS, REST APIs

- Managed stability and reliability of banking applications serving 3M+ users, achieving 99.9% system uptime through proactive monitoring and incident prevention.
- Led root cause analysis (RCA) for critical production incidents, collaborating with development teams to implement permanent code-level fixes that reduced recurring issues by 50%.
- Developed Python and PowerShell automation scripts to streamline operational tasks, reducing manual effort by 35% and saving 15+ hours weekly.
- Implemented monitoring dashboards and alerting systems using Dynatrace and Grafana, improving incident response time by 40%.

FEATURED PROJECTS

SpendWise ([Live Demo](#) | [GitHub](#)) — Elite Finance Dashboard: Built a modern SaaS-style finance dashboard. Architected reusable component systems and responsive multi-page layouts focused on performance and clean UX.

MallLite ([Live Demo](#) | [GitHub](#)) — Modern E-Commerce Platform: Developed a fully responsive e-commerce application. Focused on scalable frontend architecture, responsive design systems, and seamless user experience across devices.

JobberHaunt ([Live Demo](#) | [GitHub](#)) — SaaS Job Application Tracker: Designed and built a production-style job tracking dashboard. Implemented reusable UI architecture and modern dashboard interactions inspired by enterprise SaaS products.

EDUCATION

Postgraduate Diploma, Computer Science — Obafemi Awolowo University | 2023 – 2025

B.Sc. Biotechnology — Ekiti State University | 2014 – 2019

CERTIFICATIONS

- Meta Front-End Developer — Coursera
- Microsoft Certified: Azure Data Fundamentals — Microsoft
- Full Stack Development — Tech Studio Academy
- UiPath RPA Developer (Foundation & Advanced) — UiPath Academy
