

Caleb Adebayo

Frontend-Focused Full-Stack Engineer | Production Systems

Vancouver, British Columbia, Canada | Canadian Permanent Resident

calebtolorunleke@yahoo.com | +1 (236) 335-7976

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend-Focused Software Engineer with experience building scalable React and Next.js applications while supporting high-availability production systems across logistics, fintech, and enterprise environments. Skilled in TypeScript, Node.js, REST APIs, CI/CD, and production observability, with hands-on experience troubleshooting distributed systems and delivering reliable, performant software used by millions of users. Passionate about building maintainable frontend applications that combine exceptional user experience with production-grade reliability.

CORE TECHNICAL SKILLS

- **Frontend Development:** React.js, Next.js, TypeScript, JavaScript (ES6+), Jamstack Architecture, PWA, Tailwind CSS, HTML5/CSS3
- **Backend & APIs:** Node.js, Express.js, REST APIs, GraphQL, API Integration, Backend Debugging
- **Databases:** MongoDB, MySQL, PostgreSQL, Oracle SQL, Redis, Relational Data Modeling
- **Cloud & DevOps:** AWS (S3, CloudFront), Azure, Docker, GitHub Actions, Jenkins, CI/CD Pipelines
- **Monitoring & Observability:** Dynatrace, Grafana, Application Performance Monitoring (APM), Log Analysis
- **Testing & Code Quality:** Vitest, Jest, React Testing Library, ESLint, Prettier
- **Automation & Scripting:** Python, PowerShell, UiPath, Power Automate
- **Engineering Practices:** Git, GitHub, Jira, Confluence, Agile/Scrum, Root Cause Analysis (RCA), Incident Management, Figma

PROFESSIONAL EXPERIENCE

Purolator Inc. — Software Engineer (Frontend / Production Systems)

Remote, Canada | Aug 2025 – Present

Tech Stack: React.js, TypeScript, REST APIs, GitHub Actions, Jenkins, Dynatrace, Grafana, AWS

- Develop and maintain high-performance React and TypeScript applications for enterprise logistics platforms, delivering responsive user interfaces and scalable shipment management workflows.
- Troubleshoot complex frontend, API, and distributed-system issues while leading root cause analysis (RCA) for critical production incidents, partnering with cross-functional teams to implement permanent solutions that improve platform reliability.
- Optimize CI/CD pipelines using GitHub Actions and Jenkins, improving deployment reliability and streamlining software release processes.
- Implement monitoring and observability solutions using Dynatrace and Grafana, enabling proactive issue detection, faster incident investigation, and improved production visibility.
- Enhance client-side rendering and state management for high-volume shipment tracking applications, supporting thousands of concurrent users while maintaining 99.9% platform availability.

Skill4Skill — Contract Full Stack Engineer (Frontend Focused)

Remote, Canada | Jul 2025 – Aug 2025

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, ESLint, Git

- Developed responsive server and client components using Next.js and React, establishing scalable frontend architecture and accelerating feature delivery across the application.
- Refactored legacy code into modular, reusable React components, improving maintainability, readability, and long-term scalability.
- Established code quality standards using ESLint, Prettier, and pre-commit hooks, promoting consistent development practices and reducing integration issues across the team.

Findworka — Frontend Developer (Part-Time)

Hybrid | Nigeria / Canada | Feb 2022 – Jul 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, JavaScript

- Developed and maintained customer-facing web applications using React and modern frontend technologies, delivering responsive and user-focused experiences.
- Improved frontend performance through techniques such as code splitting, lazy loading, and application optimization, resulting in faster load times and stronger Lighthouse performance.
- Collaborated with backend developers to integrate REST APIs and deliver scalable, data-driven application features.
- Mentored junior developers on React, JavaScript, frontend architecture, and API integration best practices, improving onboarding efficiency and engineering consistency.

Guaranty Trust Bank (GTCO) — Production Engineer / Unit Head

Hybrid | Nigeria | Oct 2022 – Jul 2025

Tech Stack: Python, PowerShell, Dynatrace, Grafana, Oracle SQL, AWS, REST APIs

- Managed the stability, availability, and operational health of enterprise banking applications supporting more than 3 million users, maintaining 99.9% platform uptime.
- Led root cause analysis (RCA) for high-priority production incidents, partnering with software engineering teams to implement permanent code-level resolutions and improve long-term platform reliability.
- Developed Python and PowerShell automation scripts that streamlined operational processes, reduced manual effort, and saved more than 15 hours of repetitive work each week.
- Designed monitoring dashboards and alerting solutions using Dynatrace and Grafana, enabling faster issue detection, improved incident response, and greater operational visibility.

FEATURED PROJECTS

SpendWise — Finance Dashboard (React.js | TypeScript | Tailwind CSS)

[GitHub](#) | [Live Demo](#)

Designed and developed a production-style SaaS finance dashboard featuring reusable component architecture, responsive layouts, interactive data visualizations, and scalable UI patterns. Focused on component reusability, clean user experience, and maintainable frontend architecture using modern React and TypeScript best practices.

MallLite — Modern E-Commerce Platform (Next.js | React.js | REST APIs)

[GitHub](#) | [Live Demo](#)

Built a responsive e-commerce platform using Next.js and React with REST API integration, reusable UI components, optimized product browsing workflows, and performance-focused rendering. Implemented modern frontend architecture with Jamstack principles and Progressive Web App capabilities to deliver a fast, scalable shopping experience.

JobberHaunt — Job Application Tracker (React.js | TypeScript)

[GitHub](#) | [Live Demo](#)

Designed and built a production-inspired job application tracking platform featuring reusable dashboard components, advanced filtering and search capabilities, responsive layouts, and scalable state-driven user interfaces. Focused on creating an intuitive workflow for tracking applications while following modern frontend engineering and component design practices.

EDUCATION

Postgraduate Diploma, Computer Science — Obafemi Awolowo University | 2023 – 2025

B.Sc. Biotechnology — Ekiti State University | 2014 – 2019

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services (2026–2029)
- Meta Front-End Developer — Coursera
- Microsoft Certified: Azure Data Fundamentals — Microsoft
- Full Stack Development — Tech Studio Academy
- UiPath RPA Developer (Foundation & Advanced) — UiPath Academy
