

CALEB ADEBAYO

Frontend-Focused Full-Stack Engineer | Production Systems

Vancouver, BC | Canadian Permanent Resident | calebtolorunleke@yahoo.com | +1 (236) 335-7976

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend-Focused Full-Stack Engineer with experience building scalable React and Next.js applications and supporting high-availability production systems across fintech and enterprise environments. Skilled in TypeScript, Node.js, REST APIs, CI/CD, observability, incident response, automation, and cloud technologies. Combines user-focused frontend engineering with production reliability, cross-functional collaboration, and a strong engineering mindset to deliver scalable, maintainable software.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Design

Backend & Data: Node.js, Express.js, REST APIs, GraphQL, MongoDB, PostgreSQL, MySQL, Oracle SQL, Redis

Cloud & DevOps: AWS (S3, CloudFront), Azure, Docker, GitHub Actions, Jenkins, CI/CD

Testing & Operations: Jest, Vitest, React Testing Library, ESLint, Prettier, Dynatrace, Grafana, RCA, Incident Management

Automation & Collaboration: Python, PowerShell, UiPath, Power Automate, Git, GitHub, Jira, Confluence, Agile/Scrum, Figma

PROFESSIONAL EXPERIENCE

Skill4Skill — Contract Full-Stack Engineer (Frontend Focused)

Jul 2025 – Present

Remote, Canada

Technologies: Next.js, React.js, TypeScript, Tailwind CSS, Node.js, REST APIs, GitHub Actions, Jenkins, ESLint, Prettier

- Develop responsive, production-ready web applications using Next.js, React, and TypeScript, delivering scalable user interfaces and modern component-based frontend architecture.
- Build reusable React components and integrate REST APIs to improve maintainability, performance, and user experience.
- Enhance CI/CD pipelines using GitHub Actions and Jenkins to improve deployment reliability and streamline software releases workflows.
- Collaborate through Git-based development workflows, contributing to feature development, code reviews, and iterative product delivery.
- Refactor legacy frontend code into modular, reusable, component-driven architecture while enforcing code quality with ESLint and Prettier.

Findworka — Frontend Developer (Part-Time)

Feb 2022 – Jun 2025

Hybrid, Nigeria / Canada

Technologies: React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs

- Developed and maintained responsive customer-facing applications using React and modern JavaScript, translating product requirements into reusable UI components.
- Improved page performance through code splitting, lazy loading, asset optimization, and rendering improvements, strengthening Lighthouse results and user experience.
- Collaborated with backend engineers to integrate REST APIs and deliver scalable, data-driven product features.
- Mentored junior developers on React, JavaScript, component architecture, and API integration practices, improving onboarding and engineering consistency.

Guaranty Trust Bank (GTCO) — Production Engineer / Unit Head

Oct 2022 – Jul 2025

Hybrid, Nigeria

Technologies: Python, PowerShell, Oracle SQL, REST APIs, Dynatrace, Grafana, AWS

- Managed the stability and operational health of enterprise banking applications supporting more than 3 million users while maintaining 99.9% platform availability.
- Led root-cause analysis for high-priority incidents and partnered with engineering teams on permanent code-level and process improvements.
- Developed Python and PowerShell automation that reduced repetitive operational work by more than 15 hours per week.
- Built Dynatrace and Grafana dashboards and alerts that improved production visibility, issue detection, and incident response.

dipoleDIAMOND — Solution Engineer / RPA Developer

Apr 2021 – Oct 2022

Hybrid, Nigeria

Technologies: UiPath, Power Automate, ProcessMaker, Python, PowerShell, Oracle SQL, REST APIs

- Designed enterprise automation workflows using UiPath, Power Automate, and ProcessMaker to streamline business operations and reduce manual processing by 40%.

- Investigated workflow and application failures, implemented permanent fixes, and improved production stability through validation and exception-handling logic.
- Optimized Oracle SQL queries and backend processes to improve automation execution speed and operational efficiency.
- Built Python and PowerShell scripts that strengthened data validation, release quality, and post-deployment reliability.

PROJECTS

Moon — Collaborative E-Commerce Platform

Technologies: React, Vite, JavaScript, Tailwind CSS, React Router, Git, GitHub, Vercel

[GitHub](#) | [Demo](#)

- Led frontend development for a three-developer team as primary contributor, owning application architecture, pull-request reviews, merge quality, and production integration.
- Designed reusable layouts and product components and built responsive experiences for collections, product discovery, brand history, blog, and newsletter flows.
- Established feature-branch and pull-request workflows to reduce integration conflicts and maintain a controlled main branch and deployment process.

Eventra — Full-Stack Event Discovery Platform

Technologies: React, Vite, Tailwind CSS, Node.js, Express.js, REST APIs, Vercel

[GitHub](#) | [Demo](#)

- Built a responsive event-discovery interface with reusable event cards, category browsing, loading states, and modular content sections.
- Developed and deployed an Express REST API and connected the React frontend through environment-based asynchronous API integration.
- Deployed frontend and backend independently, troubleshooting production configuration and cross-environment integration issues.

QuickDine — Restaurant Discovery and Reservation Platform

Technologies: React, JavaScript, Tailwind CSS, React Router, Node.js, Express.js

[GitHub](#) | [Demo](#)

- Developed responsive customer and restaurant-owner user flows, including reusable authentication modal, sign-in, sign-up, and role-selection interfaces.
- Implemented controlled forms, conditional rendering, validation-ready state management, and reusable UI patterns for future reservation and authentication APIs.
- Structured the application for progressive full-stack delivery, separating reusable components, data, routes, and backend integration concerns.

EDUCATION

Postgraduate Diploma, Computer Science — Obafemi Awolowo University | 2023 – 2025

Bachelor of Science, Biotechnology — Ekiti State University | 2014 – 2019

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services (2026–2029)
- Meta Front-End Developer — Coursera
- Microsoft Certified: Azure Data Fundamentals — Microsoft
- Full-Stack Development — Tech Studio Academy
- UiPath RPA Developer, Foundation & Advanced — UiPath Academy
